

# VMWA-25 - VMWARE VREALIZE OPERATIONS: INSTALL, CONFIGURE, MANAGE [V8.6]

Categoria: **VMware**

## INFORMAZIONI SUL CORSO

**Durata:**  
5 Giorni

**Categoria:**  
VMware

**Qualifica Istruttore:**  
VMware Certified  
Instructor

**Dedicato a:**  
Professionista IT

**Produttore:**  
VMware

## OBIETTIVI

By the end of the course, you should be able to meet the following objectives:

- List the vRealize Operations use cases
- Identify features and benefits of vRealize Operations
- Determine the vRealize Operations cluster that meets your monitoring requirements
- Deploy and configure a vRealize Operations cluster
- Use interface features to assess and troubleshoot operational problems
- Describe vRealize Operations certificates
- Create policies to meet the operational needs of your environment
- Recognize effective ways to optimize performance, capacity, and cost in data centers
- Troubleshoot and manage problems using workbench, alerts, and predefined dashboards
- Manage configurations
- Configure application monitoring using VMware vRealize® Operations Cloud Appliance™
- Create custom symptoms and alert definitions, reports, and views
- Create various custom dashboards using the dashboard creation canvas
- Configure widgets and widget interactions for dashboards
- Create super metrics
- Set up users and user groups for controlled access to your environment
- Extend the capabilities of vRealize Operations by adding management packs and configuring solutions
- Monitor the health of the vRealize Operations cluster by using self-monitoring dashboards

## PREREQUISITI

Before taking this course, you must complete at least one the following:

- VMware vSphere: Install, Configure, Manage
- 6 months hands-on vRealize Operations experience

## CONTENUTI

### 1 Course Introduction

- Introduction and course logistics

- Course objectives

## **2 Introduction to vRealize Operations**

- List the vRealize Operations use cases
- Access the vRealize Operations User Interface (UI)

## **3 vRealize Operations Architecture**

- Identify the functions of components in a vRealize Operations node
- Identify the types of nodes and their role in a vRealize Operations cluster
- Outline how high availability is achieved in vRealize Operations
- List the components required to enable Continuous Availability (CA)

## **4 Deploying vRealize Operations**

- Design and size a vRealize Operations cluster
- Deploy a vRealize Operations node
- Install a vRealize Operations instance
- Describe different vRealize Operations deployment scenarios

## **5 vRealize Operations Concepts**

- Identify product UI components
- Create and use tags to group objects
- Use a custom group to group objects

## **6 vRealize Operations Policies and Certificate Management**

- Describe vRealize Operations certificates
- Create policies for various types of workloads
- Explain how policy inheritance works

## **7 Capacity Optimization**

- Define capacity planning terms
- Explain capacity planning models
- Assess the overall capacity of a data center and identify optimization recommendations

## **8 What-If Scenarios and Costing in vRealize Operations**

- Run what-if scenarios for adding workloads to a data center
- Discuss the types of cost drivers in vRealize Operations
- Assess the cost of your data center inventory

## **9 Performance Optimization**

- Introduction to performance optimization
- Define the business and operational intentions for a data center
- Automate the process of optimizing and balancing workloads in data centers
- Report the results of optimization potential

## **10 Troubleshooting and Managing Configurations**

- Describe the troubleshooting workbench
- Recognize how to troubleshoot problems by monitoring alerts
- Use step-by-step workflows to troubleshoot different vSphere objects
- Assess your environment's compliance to standards

- View the configurations of vSphere objects in your environment

## **11 Operating System and Application Monitoring**

- Describe native service discovery and application monitoring features
- Configure application monitoring
- Monitor operating systems and applications by using VMware vRealize® Operations Cloud Appliance™

## **12 Custom Alerts**

- Create symptom definitions
- Create recommendations, actions, and notifications
- Create alert definitions that monitor resource demand in hosts and VMs
- Build and use custom views in your environment

## **13 Custom Views and Reports**

- Build and use custom views in your environment
- Create custom reports for presenting data about your environment

## **14 Custom Dashboards**

- Create dashboards that use predefined and custom widgets
- Configure widgets to interact with other widgets and other dashboards
- Configure the Scoreboard widget to use a metric configuration file
- Manage dashboards by grouping dashboards and sharing dashboards with users

## **15 Super Metrics**

- Recognize different types of super metrics
- Create super metrics and associate them with objects
- Enable super metrics in policies

## **16 User Access Control**

- Recognize how users are authorized to access objects
- Determine privilege priorities when a user has multiple privileges
- Import users and user groups from an LDAP source

## **17 Extending and managing a vRealize Operations Deployment**

- Identify available management packs in the VMware Marketplace™
- Monitor the health of a vRealize Operations cluster
- Generate a support bundle
- View vRealize Operations logs and audit reports
- Perform vRealize Operations cluster management tasks

## **INFO**

**Esame:** 2V0-32.22 - VMware Cloud Operations 8.x Professional --- VMware Certified Professional - Cloud Operations (VCP-CO)

**Materiale didattico:** Materiale didattico ufficiale VMware in formato digitale

**Costo materiale didattico:** incluso nel prezzo del corso a Calendario

**Natura del corso:** Operativo (previsti lab su PC)
