

MDAI-1 - MOC AI-102T00 - DEVELOP AI SOLUTIONS IN AZURE

Categoria: Data & Al

INFORMAZIONI SUL CORSO

<u>I</u>

£55

Durata: 5 Giorni

Categoria: Data & Al Qualifica Istruttore: Microsoft Certified Dedicato a: Professionista IT Produttore:

Trainer

OBIETTIVI

Al-102: Develop Al solutions in Azure is intended for software developers wanting to build Al infused applications that leverage Azure Al Foundry and other Azure Al services. Topics in this course include developing generative Al apps, building Al agents, and solutions that implement computer vision and information extraction.

PREREQUISITI

This course was designed for software engineers concerned with building, managing and deploying AI solutions that leverage Azure AI Foundry and other Azure AI services. They are familiar with C# or Python and have knowledge on using REST-based APIs and SDKs to build generative AI, computer vision, language analysis, and information extraction solutions on Azure.

CONTENUTI

Develop generative AI apps in Azure

- -Plan and prepare to develop AI solutions on Azure
- -Choose and deploy models from the model catalog in Azure Al Foundry portal
- -Develop an AI app with the Azure AI Foundry SDK
- -Get started with prompt flow to develop language model apps in the Azure Al Foundry
- -Develop a RAG-based solution with your own data using Azure Al Foundry
- -Fine-tune a language model with Azure Al Foundry
- -Implement a responsible generative AI solution in Azure AI Foundry
- -Evaluate generative AI performance in Azure AI Foundry portal

Develop AI agents on Azure

- -Get started with AI agent development on Azure
- -Develop an AI agent with Azure AI Foundry Agent Service
- -Develop AI agents with the Azure AI Foundry extension in Visual Studio Code
- -Integrate custom tools into your agent
- -Develop a multi-agent solution with Azure Al Foundry Agent Service
- -Integrate MCP Tools with Azure AI Agents
- -Develop an AI agent with Semantic Kernel
- -Orchestrate a multi-agent solution using the Microsoft Agent Framework

-Discover Azure Al Agents with A2A

Develop natural language solutions in Azure

- -Analyze text with Azure Al Language
- -Create question answering solutions with Azure Al Language
- -Build a conversational language understanding model
- -Create a custom text classification solution
- -Custom named entity recognition
- -Translate text with Azure Al Translator service
- -Create speech-enabled apps with Azure Al services
- -Translate speech with the Azure Al Speech service
- -Develop an audio-enabled generative AI application
- -Develop an Azure Al Voice Live agent

Develop computer vision solutions in Azure

- -Analyze images
- -Read text in images
- -Detect, analyze, and recognize faces
- -Classify images
- -Detect objects in images
- -Analyze video
- -Develop a vision-enabled generative AI application
- -Generate images with AI

Develop AI information extraction solutions in Azure

- -Create a multimodal analysis solution with Azure Al Content Understanding
- -Create an Azure Al Content Understanding client application
- -Use prebuilt Document intelligence models
- -Extract data from forms with Azure Document intelligence
- -Create a knowledge mining solution with Azure Al Search

INFO

Esame: Al-102 - Designing and Implementing a Microsoft Azure Al Solution **Materiale didattico:** Materiale didattico ufficiale Microsoft in formato digitale

Costo materiale didattico: incluso nel prezzo del corso a Calendario

Natura del corso: Operativo (previsti lab su PC)
