MSEC-5 - MOC SC-100T00 - MICROSOFT CYBERSECURITY ARCHITECT

Categoria: **MS Security**

INFORMAZIONI SUL CORSO

Durata:	Categoria:	Qualifica Istruttore:	Dedicato a:	Produttore:
4 Giorni	MS Security	Microsoft Certified Trainer	Analista	Microsoft

OBIETTIVI

This is an advanced, expert-level course. Although not required to attend, students are strongly encouraged to have taken and passed another associate level certification in the security, compliance and identity portfolio (such as AZ-500, SC-200 or SC-300) before attending this class. This course prepares students with the expertise to design and evaluate cybersecurity strategies in the following areas: Zero Trust, Governance Risk Compliance (GRC), security operations (SecOps), and data and applications. Students will also learn how to design and architect solutions using zero trust principles and specify security requirements for cloud infrastructure in different service models (SaaS, PaaS, IaaS).

PREREQUISITI

This course is for experienced cloud security engineers who have taken a previous certification in the security, compliance and identity portfolio. Specifically, students should have advanced experience and knowledge in a wide range of security engineering areas, including identity and access, platform protection, security operations, securing data, and securing applications. They should also have experience with hybrid and cloud implementations. Beginning students should instead take the course SC-900: Introduction to Microsoft Security, Compliance, and Identity.

CONTENUTI

Design solutions that align with security best practices and priorities

- -Introduction to Zero Trust and best practice frameworks
- -Design security solutions that align with the Cloud Adoption Framework (CAF) and Well-Architected Framework (WAF)
- -Design solutions that align with the Microsoft Cybersecurity Reference Architecture (MCRA) and Microsoft cloud security benchmark (MCSB)
- -Design a resiliency strategy for ransomware and other attacks based on Microsoft Security Best Practices

Design security operations, identity, and compliance capabilities

- -Design solutions for regulatory compliance
- -Design solutions for identity and access management
- -Design solutions for securing privileged access
- -Design solutions for security operations
- -Interactive case study: Modernizing identity and data security

-Interactive case study: Modernizing user access control and threat resilience

Design security solutions for applications and data

-Evaluate solutions for securing Microsoft 365
-Design solutions for securing applications
-Design solutions for securing an organization's data
-Interactive case study: Securing apps and data

Design security solutions for infrastructure

-Specify requirements for securing SaaS, PaaS, and IaaS services
-Design solutions for security posture management in hybrid and multicloud environments
-Design solutions for securing server and client endpoints
-Design solutions for network security
-Interactive case study: Securing endpoints and infrastructure

INFO

Esame: SC-100 - Microsoft Cybersecurity Architect
Materiale didattico: Materiale didattico ufficiale Microsoft in formato digitale
Costo materiale didattico: incluso nel prezzo del corso a Calendario
Natura del corso: Teorico Metodologico
